PROFESSIONAL SUMMARY

B.Tech Information Technology graduate with a strong foundation in Python, SQL, data analysis, database concepts, and problem solving. Familiar with data manipulation, data cleaning, exploratory analysis, and developing solutions using programming and analytical techniques. Strong interest in data analytics, business reporting, and technology-driven problem solving. Seeking an entry-level Associate Analyst opportunity at Wipro where I can apply my technical and analytical skills while developing professionally.

TECHNICAL SKILLS

Programming: Python, C/C++, JavaScript

Database: SQL, MySQL

Data Analytics: Data Cleaning, Exploratory Data Analysis, Data Manipulation, Basic Statistics

Tools: Microsoft Excel, Git, GitHub

Concepts: Data Structures & Algorithms, DBMS, OOP, Operating Systems, Computer Networks

Visualization: Basic Data Visualization and Reporting

PROJECTS

1. EDU FLUXUS — Institutional CMS Platform

PHP | MySQL | JavaScript

- Analyzed functional requirements and translated them into structured test scenarios and test cases.
- Designed and executed 40+ test cases covering authentication workflows, role-based access control, and content management.
- Validated application workflows and database-backed functionality through systematic manual testing.
- Identified critical defects involving session handling and privilege-related edge cases and documented detailed bug reports.
- Performed regression testing after fixes to verify functionality, stability, and system reliability.

2. Student Attendance Management System

PHP | MySQL | HTML | CSS | JavaScript

- Tested core modules including login, attendance marking, data retrieval, and CRUD operations.
- Used structured test data to validate database operations and verify data integrity across multiple testing cycles.
- Designed test scenarios for edge cases including invalid inputs and duplicate records.
- Analyzed unexpected system behavior, documented defects, and collaborated on their resolution.

3. GATE 2027 Preparation Platform

Python | JavaScript | HTML | CSS

- Performed UI and usability testing across multiple modules to improve navigation, readability, and overall user experience.
- Validated search and filtering functionality to ensure accurate retrieval and presentation of relevant information.
- Identified usability and basic performance issues and communicated findings for corrective action.

INTERNSHIP EXPERIENCE

Website Developer — Dene Branding

Aug 2025 – Oct 2025

- Executed manual functional and cross-browser testing across Chrome, Firefox, and Safari to identify UI and compatibility issues before deployment.
- Analyzed project requirements and validated application behavior against expected functional outcomes.
- Identified, documented, and tracked defects using structured bug reports covering severity, reproduction steps, expected results, and actual results.
- Investigated and helped resolve 15+ UI inconsistencies and performance issues in collaboration with developers.
- Participated in structured QA workflows, defect tracking, documentation, and asynchronous team communication.
- Collaborated with developers to analyze issues, communicate findings, and verify fixes through retesting and validation.

EDUCATION

B.Tech – Information Technology

University of Calicut | Sep 2021 – May 2025

CERTIFICATIONS & LEARNING

Selenium WebDriver with Python — Udemy (In Progress, 2025–26)

EA Sports Software Engineer Job Simulation — Forage

SQL Course in Udemy

ADDITIONAL STRENGTHS

- Analytical and logical problem solving
- Strong willingness to learn new technologies
- Ability to work with structured and unstructured data
- Good understanding of programming and database fundamentals
- Adaptable to new tools, technologies, and business requirements
