

MUHAMMED RASHID P P

Software Application Developer

Kozhikode, Kerala | Phone: +91 9745393044 | <https://rashidxmhd.vercel.app>

rashid.mhd.pp@gmail.com | GitHub: <https://github.com/Rashidrxq> | LinkedIn: <https://www.linkedin.com/in/muhammedrashidpp>

PROFESSIONAL SUMMARY

B.Tech in Information Technology graduate (2025) with hands-on experience developing AI-powered and full-stack web applications using Python, JavaScript, PHP, and MySQL. Strong foundation in software engineering principles, object-oriented programming, data structures, RESTful APIs, and database design through academic and personal projects. Passionate about solving real-world problems, learning new technologies, and building reliable, scalable software. Seeking to contribute technical skills, curiosity, and a growth mindset to Google's Software Application Development Apprenticeship.

TECHNICAL SKILLS

Programming Languages: Python, C, JavaScript, SQL, HTML5, CSS3.

Frameworks & Libraries: Node.js, Express.js, Flask, React, Bootstrap.

Databases: MySQL, SQLite, PostgreSQL.

Developer Tools: Git, GitHub, Postman, Visual Studio Code, Google Workspace.

Computer Science Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), RESTful APIs, Database Design, Authentication & Authorization, CRUD Operations, Debugging, Software Testing

PROJECTS

AI-BASED POULTRY DISEASE DETECTION SYSTEM | GITHUB: [HTTPS://GITHUB.COM/RASHIDRXQ/AVIAN-PROJECT](https://github.com/Rashidrxq/AVIAN-PROJECT)

Tech Stack: Python, YOLOv8, EfficientNet, Flask, REST APIs, Flutter.

- Engineered an end-to-end computer vision application using YOLOv8 and EfficientNet for automated poultry disease detection and classification.
- Designed and developed RESTful APIs using Flask to deploy deep learning models for real-time inference and application integration.
- Built data preprocessing and augmentation pipelines, improving model performance through feature engineering and hyperparameter optimization.
- Collaborated with a multidisciplinary team to integrate AI components into a modular software architecture, following software engineering best practices and version control workflows.

CODEPILOT – ONLINE CODING INTERVIEW PLATFORM | GITHUB: [HTTPS://GITHUB.COM/RASHIDRXQ/CODEPILOT](https://github.com/Rashidrxq/CODEPILOT)

Tech Stack: Python, FastAPI, React, PostgreSQL, JWT, REST APIs.

- Developed a full-stack coding platform featuring JWT-based authentication, user dashboards, and structured coding challenge workflows.
- Designed and implemented RESTful APIs using FastAPI and PostgreSQL for coding problem management, user submissions, and progress tracking.
- Integrated an online code execution service to evaluate Python solutions against predefined test cases and deliver real-time execution feedback.
- Built a responsive React frontend with an interactive code editor, live submission results, and reusable component-based architecture.

ATTENDANCE MANAGEMENT SYSTEM | GITHUB: [HTTPS://GITHUB.COM/RASHIDRXQ/REMEXT_ATTENDANCE_SYSTEM](https://github.com/Rashidrxq/REMEXT_ATTENDANCE_SYSTEM)

Tech Stack: Node.js, Express.js, PostgreSQL, JavaScript, HTML5, CSS3, REST APIs.

- Developed a role-based Attendance Management System featuring QR code-based check-in/check-out to automate tracking for 100+ employees.
- Implemented secure authentication, authorization, and attendance modules using Express.js and PostgreSQL.
- Built RESTful APIs for attendance, employee management, leave tracking, and report generation.
- Optimized PostgreSQL queries and responsive interfaces to improve application performance, data integrity, and user experience.

INTERSHIP EXPERIENCE

Software Developer Intern

Dene Branding | Aug 2025 – Oct 2025

- Developed responsive web applications using PHP, JavaScript, HTML, CSS, and MySQL.
- Implemented new features and maintained existing applications based on business requirements.
- Debugged and resolved UI and performance issues, improving application reliability.
- Performed functional and cross-browser testing before production deployment.
- Collaborated with developers to deliver scalable and maintainable software solutions.

EDUCATION

Bachelor of Technology (B.Tech)– Information Technology

University of Calicut | 2021 – 2025

CERTIFICATIONS & LEARNING

Selenium WebDriver with Python — Udemy (In Progress, 2025–26)

EA Sports Software Engineer Job Simulation — Forage
